

BRIAN KALALI MUSAU

Full-Stack Software Developer

Nairobi, Kenya | brianakash61@gmail.com | +254 718 073 997 | github.com/Bri-ankash

PROFILE

Full-stack software developer and BSc Software Development student at KCA University, building practical SaaS, fintech and marketplace systems with Python/FastAPI, React/Next.js and PostgreSQL. I have worked on M-Pesa payment flows, authentication, dashboards, admin panels, data parsing and deployments. I am strongest where a product needs the backend logic and the frontend experience to come together cleanly.

TECHNICAL SKILLS

Backend	Python, FastAPI, Django, Flask, Node.js, REST APIs, JWT auth, OTP flows, 2FA, M-Pesa STK Push
Frontend	React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, responsive dashboards
Data	PostgreSQL, Neon DB, SQLite, MySQL, Supabase, CSV/PDF statement parsing, reporting workflows
Tools	Git, GitHub, Docker basics, Render, Vercel, Railway, Linux CLI, VS Code, debugging and deployment

SELECTED PROJECT EXPERIENCE

Servigo - Service Marketplace

Tech: FastAPI, React, PostgreSQL/Neon, M-Pesa, reCAPTCHA

- Built a marketplace for connecting clients with service providers across many local service categories.
- Designed core trust and booking flows, including provider scoring, private booking/chat logic, email OTP authentication and reCAPTCHA protection.
- Worked on M-Pesa escrow/payment flow and practical product rules for a Kenyan service marketplace context.

Smart Pochi / Kali Works - M-Pesa Financial Analysis SaaS

Tech: FastAPI, Python, PostgreSQL, Render, M-Pesa data

- Built tools that help users upload M-Pesa statements and turn transaction data into useful financial reports.
- Implemented dashboards for spending patterns, cash movement, financial health and business decision support.
- Worked on authentication, admin access, database migration and deployment workflows for production-style use.

Smart Brayo Shop - Full-Stack E-commerce Platform

Tech: Python, FastAPI, SQLite, Tailwind CSS, JavaScript

- Built client and admin dashboards for product browsing, user accounts, wishlist, cart and product management.
- Implemented email verification, session handling, admin 2FA and product upload workflows.

ChamaKash - Group Savings Platform

Tech: FastAPI/Django, React, PostgreSQL

- Developed a platform concept for chama groups to manage members, contributions, reports and internal accountability.
- Focused on replacing manual WhatsApp and paper-based tracking with structured records and clearer reporting.

Dishi Poa - Restaurant Ordering Platform

Tech: Next.js, Node.js, PostgreSQL

- Worked on an ordering system for small restaurants, covering menu management, order flow and payment-ready workflows.
- Designed the product around simple operations and low-friction use for local restaurants.

EDUCATION

Year	Institution	Qualification
2024 - Present	KCA University	BSc Software Development with Applied Computing
2019 - 2022	St Charles Lwanga School	KCSE
2011 - 2018	Moi Air Base Primary School	KCPE

CERTIFICATIONS & ACHIEVEMENTS

- Built and deployed multiple full-stack applications across Vercel, Render, Railway and Termux-based environments.
- Implemented practical authentication features including email verification, OTP flows, 2FA and protected admin areas.
- Hands-on experience with M-Pesa payment integration, financial reporting workflows and responsive web dashboards.
